

# Tourist Payment Service

Payment solutions for a shrinking world

## Operating Globally. Thinking Locally.

Did you know that Elavon can authorise payments in nearly 100 currencies?

Whether for holidays, business trips or educational opportunities, millions of people from all over the world visit Europe every year. Many and varied businesses in tourist locations serve visitors from other countries and the rise of online shopping opens your business to shoppers everywhere. So if your business regularly attracts European or International customers, Elavon is ideally placed to make processing their payments completely seamless.

Elavon's Tourist Payment Service combines Dynamic Currency Conversion, multi-currency capabilities and a unique tax-free solution providing service and choice to your travelling customers, AND delivers new lines of revenue to your business.

## 1 Simple & Seamless

Get fully functional solutions operating all from just one point-of-sale device.

## 2 New Source of Revenue

Create a new source of revenue while benefiting your international clientele.

## 3 Improved Customer Service

Appeal to your international customers with the simplicity these solutions offer.

Elavon has a number of ways to help you provide a better service to your foreign customers

  
Elavon

# Instant. Immediate. Easy to use.

## Dynamic Currency Conversion (DCC)

As you can imagine, most people are more comfortable making purchases in their home currency. Yet typically when travelling, card payments are made in the local currency and converted later, with the card holder paying a conversion fee to the card issuer. Imagine your customers' pleasure if you could offer to take their payment in their home currency, so they know exactly how much they are paying for it, there and then.

Available in card-present, mail order/telephone order, and online e-commerce environments, Elavon's DCC converts international Visa and MasterCard purchases for up to 48 currencies (more than any other processor) at the time of sale and rebates a portion of the conversion fee back to your business; pure profit for you. Elavon manages the entire conversion process – from direct treasury exchange rates and transaction processing, to back-end reconciliation, settlement, funding and support. That means in addition to realising bottom line benefits, your business enjoys added efficiency from a single provider. It couldn't be simpler.

## Tax-free service

Through the same point-of-sale device used to process all your credit and debit transactions, cardholders who are eligible for international tax refunds are automatically recognised and provided with the information needed to reclaim international tax duties on the purchase of goods.

When combined with DCC, Elavon's Tax-Free Service helps your business better serve travelling your customers, while generating additional revenue for your business through rebates from a portion of conversion fees.

## Multi-currency processing

Elavon's multi-currency solution allows you to market your products and services on your website in nearly 100 of the world's leading currencies. So if you operate your business over the internet you can offer your products to a number of different international markets in local currencies. Cardholders can pay in their local currency and we process and fund the payment to you in your home currency. It couldn't be simpler.
